To Run the python code:

Copy the RandomForest.py and datasets in a folder and use below command line format to execute in linux terminal.

```
python RandomForest.py train_data.csv valid_data.csv test_data.csv
```

Ex: python RandomForest.py train_c300_d100.csv valid_c300_d100.csv test_c300_d100.csv

The train_data.csv, validation_data and test_data is must to run the program.
